

**Amendment to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended) A method of handling reminders in a handportable communication terminal, comprising

- manually entering ~~of character~~characters into a text editor window for providing a reminder text,
- entering time information into a time entry window for setting a reminder time,
- providing real time clock information from a clock application,
- comparing said time information with the real time clock information, ~~and~~
- alerting when the real time clock has reached said reminder time, and
- transmitting a reminder to a remote second communication terminal via a wireless communication network based on the alerting.

2. (original) A method according to claim 1, wherein the alerting comprises display of the reminder text.

3. (currently amended) A handportable communication terminal, including

- a control unit,

- a user interface including a display, text input means, ~~and~~ said user interface is being controlled by the control unit,
- a clock application controlled by the control unit, and having a clock function and a reminder application which the display can present,
  - said reminder application has:
    - a text editor window in which the user through the user interface enters a reminder text label, and
    - a time entry window in which the user through the user interface enters a date and time for the reminder,
    - and an alert unit that alerts when the clock reaches the entered date and time for the reminder,
  - wherein the reminder application allows the user to transmit a reminder to a remote second communication terminal via a wireless communication network.

4. (original) A handportable communication terminal according to claim 3, and comprising a clock application providing real time clock information to the reminder application, and said reminder application displays a reminder note when the real time clock has reached the reminder time.

5. (original) A handportable communication terminal according to claim 3, wherein the reminder application provides the user access to "Add new" reminders, "View all" existing reminders and "Erase" existing reminders.

6. (canceled)

7. (currently amended) A handportable communication terminal according to ~~claim 6~~claim 3, wherein the reminder application upon receiving instructions to send a reminder requests the user to enter a phone number on the receiver of the reminder.

8. (original) A handportable communication terminal according to claim 7, wherein the reminder application allows the user to search for the phone number of the receiving terminal in an internal phone number database of the transmitting terminal.

9. (currently amended) A handportable communication terminal according to ~~claim 6~~claim 3, wherein the reminder application allows the user to inspect a reminder received from a remote second communication terminal via a wireless communication network.

10. (original) A handportable communication terminal according to claim 9, wherein the reminder application furthermore allows the user to save or discard a reminder received from a remote second communication terminal.

11. (currently amended) A handportable communication terminal according to ~~claim 6~~claim 3, wherein the reminders are transferred via the wireless

communication network included in a message according to the Smart Messaging Specification.

12. (previously presented) A handportable communication terminal according to claim 7, wherein the reminders are transferred via the wireless communication network included in a message according to the Smart Messaging Specification.

13. (previously presented) A handportable communication terminal according to claim 8, wherein the reminders are transferred via the wireless communication network included in a message according to the Smart Messaging Specification.

14. (previously presented) A handportable communication terminal according to claim 9, wherein the reminders are transferred via the wireless communication network included in a message according to the Smart Messaging Specification.

15. (previously presented) A handportable communication terminal according to claim 10, wherein the reminders are transferred via the wireless communication network included in a message according to the Smart Messaging Specification.
